The Marked Transformation in Learning and Teaching

Emerging Attributes of Pedagogy and Curriculum for the "New World Order" 7

Hitendra Pillay and Bob Elliott

Explanation of a model for pedagogy and curriculum development with the potential to deliver an education system for the "new world order"

The Faculty Development Portfolio: A Framework for Documenting the Professional Development of Faculty Developers 23

Christine A. Stanley

An outline of the work of faculty developers, identification of characteristics of effective developers, and definition of the steps involved in creating a faculty development partfolio

Reflection in Higher Education: A Concept Analysis 37

Russell R. Rogers

A critical analysis of the concept of reflection and discussion of the implications of the findings for higher education

Assessment of Cooperative Learning: A Goal-Criterion Approach 59

Vernon A. Quarstein and Polly A. Peterson

Presentation of a model to assess group learning and explanation of application to group-based case study courses with innovative enhancements

Guest Reviewers, Volume 25 79

Innovative Higher Education

Volume 26, Number 2, Winter 2001

Editor's Address 83

Ronald D. Simpson

From Adequacy to Excellence: Honoring the Scholarship of Learning and Teaching

Teaching and Exploring the Social Implications of Twenty-first Century Molecular Biology in a Laboratory-Based General Education Course 87

Cheryl A. Kerfeld, Marc Levis, and L. Jeanne Perry

Explanation of an unusual course, which includes DNA sequencing experiences and explores the social, economic, and ethical issues resulting from advances in biotechnology

Looking Beyond the Valley: A Five-Year Case Study of Course Innovation 103

Gary K. Allen, John F. Wedman, and Lillian C. Folk

Report of a five-year longitudinal study of course development and innovation process and its impact on student ratings of course quality

Unrolling Roles in Techno-Pedagogy: Toward New Forms of Collaboration in Traditional College Settings 121

Alison Cook-Sather

An innovative examination of the roles of professors, students, librarians, and technology support staff and description of workshop

Theory of Multiple Intelligences: Implications for Higher Education 141

Adrianna Kezar

A discussion of the implications of Gardner's theory of multiple intelligences with a focus on increasing access, meeting needs of diverse learners, and addressing accountability issues

Innovative Higher Education

Volume 26, Number 3, Spring 2002
